

The Telescope Interest Group will have a Star Party on Thursday, April 27, 2017. Richard Sandler, a local astronomer, has graciously arranged for us to go to the AMOS (Associated Modelers of Sacramento) model airplane field, right here in Lincoln. Ron and I have checked out this site and we were quite impressed with the access, visibility and convenience that it offered. **The site is 4015 East Catlett, west of Thunder Valley Casino (Athens past the casino, right on Fiddymnt, left on East Catlett...the site is a short distance on your left)** We have enclosed a map to the site and we request that you respond to this email if you plan to attend.(bobpcoll@community.net). We would like to give Mr. Sandler a count as to how many T.I.G. members to expect. Also, if you plan to bring your telescope, we would like a count of that as well.....

Sunset is @ 7:54 - Recommended arrival time is 7:00 for setup of your telescope. Please arrive before sunset.....Looking forward to seeing you on April 27th.....
